Maths Challenge

Our year 12's compete every year in the highly competitive senior maths challenge ran by the UKMT. It is an opportunity for our top performers in mathematics to put their problem-solving skills to the test as they work on a series of increasingly challenging maths problems. Our students performed exceptionally well this year with three certificates being awarded across the year group. So congratulations to *Edgar M* (Gold certificate), *Ilyas A* (Silver certificate) and *Ibrahim U* (Bronze certificate) for the awards they received. *Edgar M*, who ranked in the top 8-9% of entrants has also been invited to compete in the next stage of the competition, the *Andrew Jobbings Senior Kangaroo*. Congratulations Edgar!

The psychology of crime, exploring the mind workshop

Delivered by the University of Law

Taking place on Thursday 24th October 3:10-4:10pm in the Drama Studio

We are delighted to invite students from years 10 -13 to join this workshop on careers in psychology and criminology. This session will explore how psychology influences criminal cases. You'll learn how our personalities shape our behaviour. We'll identify how geo-profiling could be used to track offenders using the Circle Hypothesis. We will look at how eyewitness testimonies can affect a criminal case and test their own attention. Through understanding the minds of a jury, we will investigate how biases or personalities of jurors can impact the outcome of a trial.

Students will need to sign up via the following link: <https://forms.gle/WVDd8Mga3ffF1PSg7>
